Data modelling and form design for a business application in Zoho Creator.

AIM:

To design and develop a Student Admission Enquiry Management application using Zoho Creator, demonstrating the implementation of all thirteen Basic Fields available in the Form Builder for capturing, validating, storing, and managing prospective student admission enquiries in a structured digital format.

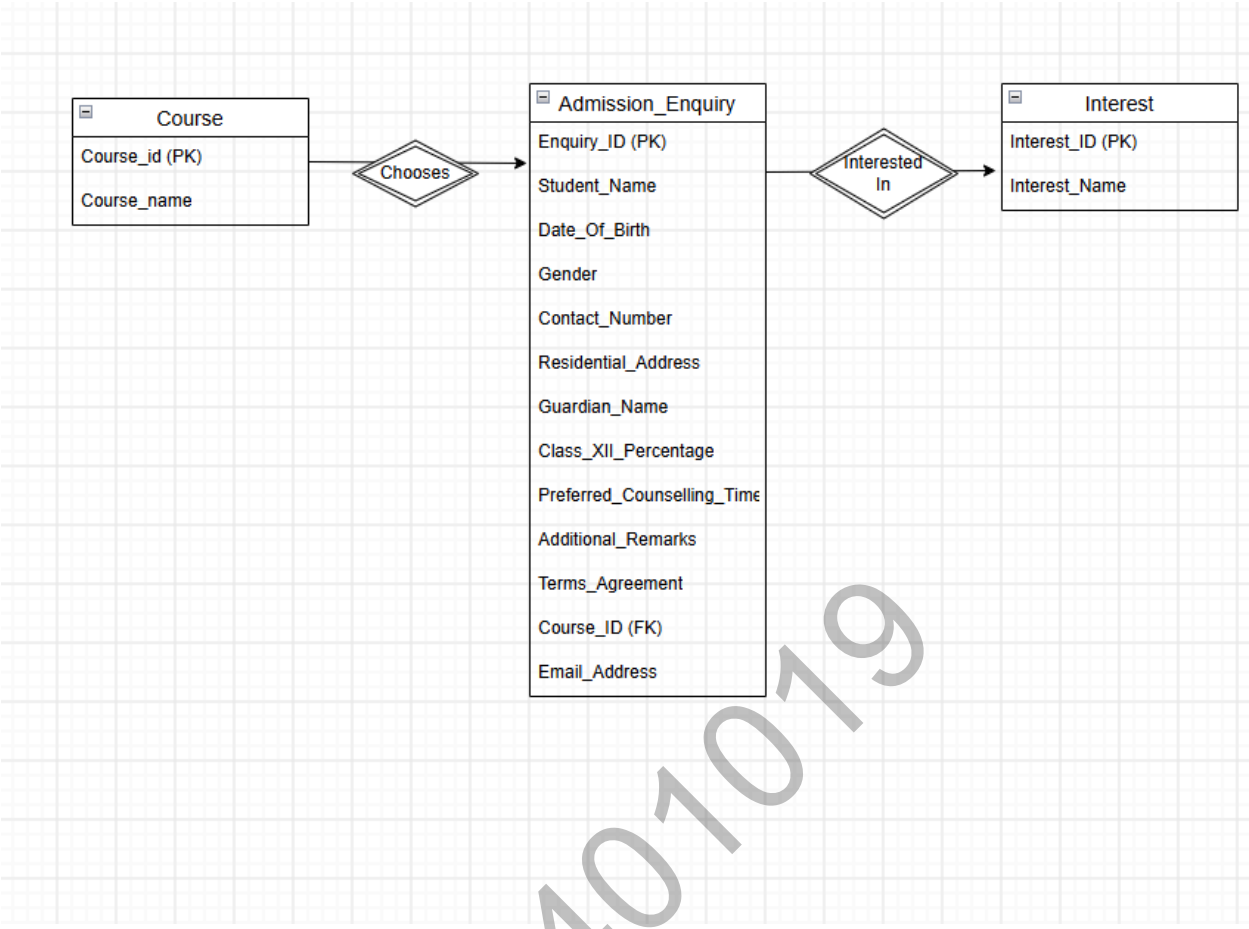

PROCEDURE

1. ER Diagram Design

- Identified the entities required for the admission enquiry system.
- Created the ER Diagram with the following entities:
    - Admission_Enquiry
    - Course
    - Interests
    - Enquiry_Interest
- Defined attributes, primary keys, foreign keys, and relationships between entities.
- Established:

One-to-Many relationship between Course and Admission_Enquiry.
Many-to-Many relationship between Admission_Enquiry and Interests through Enquiry_Interest.

2. Application Features

The application provides the following features:

- Collection of student admission enquiries through an online form.
- Storage of applicant personal and academic information.
- Selection of preferred course and areas of interest.
- Scheduling of counselling time.
- Validation of mandatory fields and data formats.
- Storage of submitted records in a report view.
- Follow-up support for admission cell staff.
- Automated email confirmation to applicants.

3. Drag and Drop Form Creation

- Opened Zoho Creator and created a new application named **Student Admission Enquiry Management**.
- Created a form named **Admission_Enquiry_Form**.

- Used the drag-and-drop Form Builder to add all thirteen Basic Fields:
    - Name
    - Email
    - Address
    - Phone
    - Single Line
    - Multi Line
    - Number
    - Date
    - Time
    - Drop Down
    - Radio
    - Multi Select
    - Checkbox
- Organized the fields into logical sections for better usability.

4. Objective

The objective of this application is to design and build a functional Student Admission Enquiry Form using Zoho Creator that demonstrates the correct usage of all thirteen Basic Fields available in the Form Builder while addressing the institutional requirement of collecting structured student admission enquiries.

5. Problem Statement and Scope

The Admissions Office receives enquiries through multiple channels such as phone calls, emails, and walk-ins, resulting in inconsistent and incomplete records. To address this issue, a centralized digital form was developed to capture personal details, contact information, academic preferences, counselling schedules, and consent details in a structured and validated manner.

24140109

Application Name: Student Admission Enquiry Management

Form Name: Admission_Enquiry_Form

Primary Users:

- Prospective Students
- Admission Cell Staff

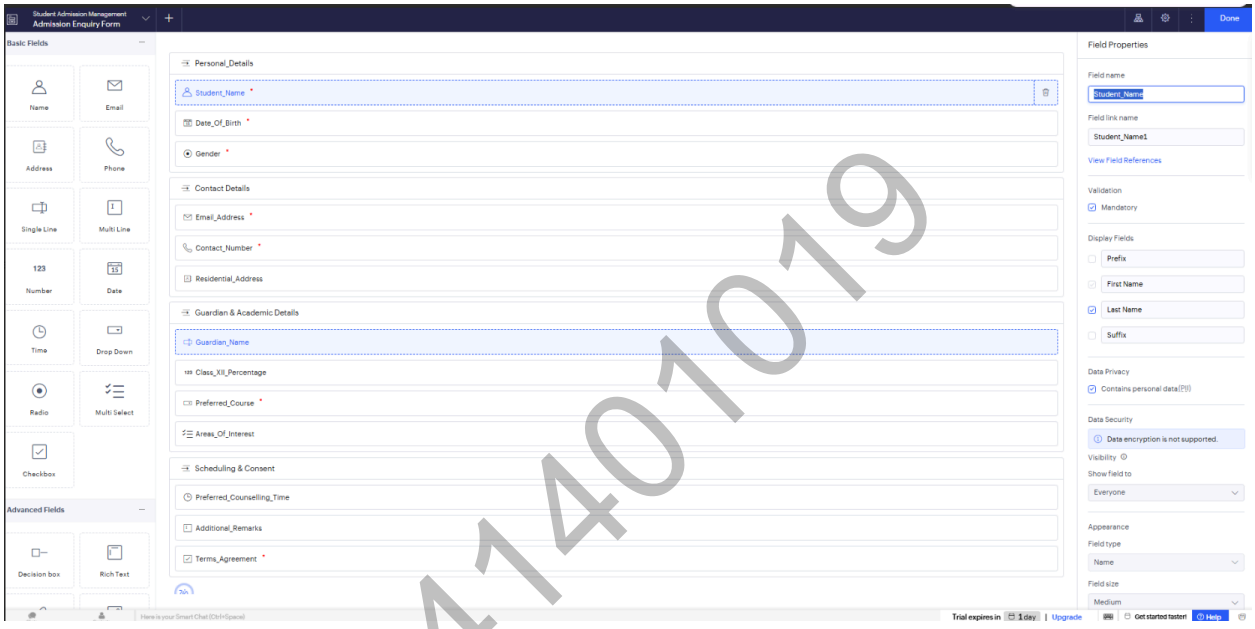

Report Name:

- Admission_Enquiry_Report

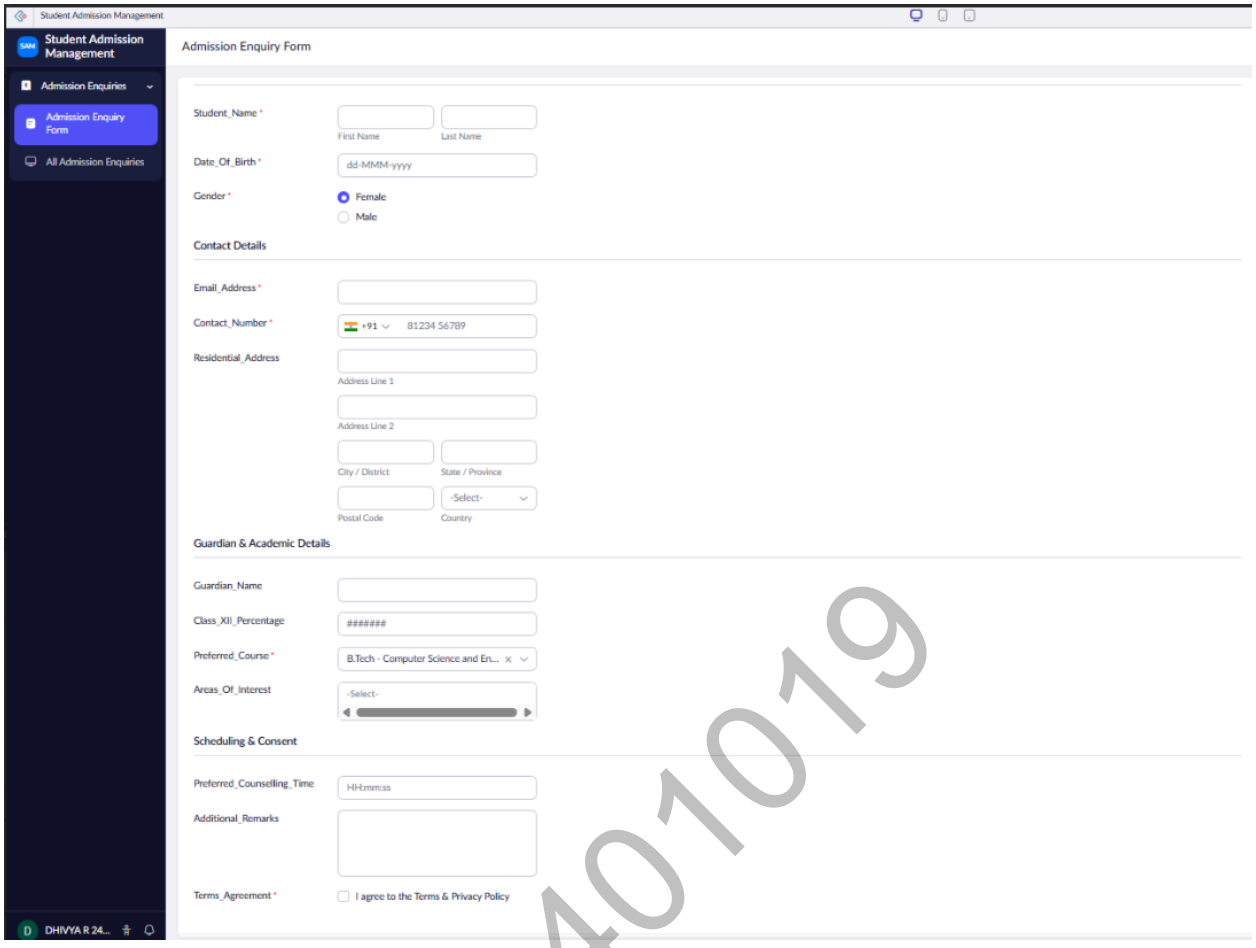

Purpose of Report:

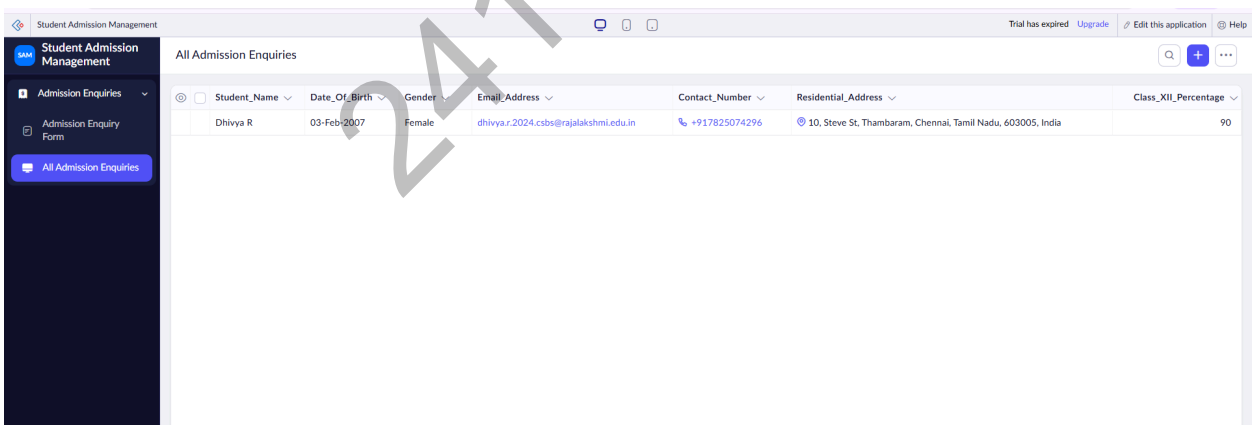

- Review submitted enquiries.
- Filter enquiries based on preferred course.
- Track and schedule counselling sessions.
- Maintain a centralized database of admission enquiries.

Output

24140101019

24140101019

Result

The Student Admission Enquiry Management application was successfully created in Zoho Creator. The form efficiently collects, validates, and stores prospective student information, thereby providing a structured and centralized admission enquiry management system for the institution.
